

Privacy Policy

Effective : April 28th , 2021

Thank you for your interest in our app SolXView (hereinafter referred to as "App") .

Data protection has a particularly high priority for the following publisher of this app: Jan Heuer. The use of the app is possible without any indication of personal data.

The app does not collect or require any personal data. Only in case the user wants to use the weather and UVI forecast for the location of the photovoltaic installation, the app will request to use the present location of your iOS device to store this location. It is not required and also not recommended to enable continuous access to the device location of the user's iOS device.

. However, if a user wants to use the support of our website, processing of personal data could become necessary. If processing of personal data is necessary and if there is no legal basis for such processing, we will generally obtain the consent of the user.

The processing of personal data, such as the name, address, e-mail address, or telephone number of a user shall always be in line with the General Data Protection Regulation, and in accordance with the country-specific data protection regulations applicable to Jan Heuer. By means of this data protection declaration, our enterprise would like to inform the public about the type, scope and purpose of the personal data we collect, use and process. Furthermore, users are informed of their rights by means of this data protection declaration.

As the developer, Jan Heuer has implemented numerous technical and organisational measures

to ensure the most complete protection of personal data processed through this website. Nevertheless, Internet-based data transmissions can always have security vulnerabilities, so that absolute protection cannot be guaranteed. For this reason, every user is free to transmit personal data to us by alternative means, for example by telephone.

1. definitions

The data protection declaration of the App and the corresponding support website is based on the terms used by the European Data Protection Supervisor when adopting the Data Protection Regulation (DS-GVO). Our data protection declaration should be easy to read and understand for the public as well as for our customers and business partners. To ensure this, we would like to explain the terms used in advance.

We use the following terms, among others, in this data protection declaration:

1) Personal data

Personal data is any information relating to an identified or identifiable natural person (hereinafter "user"). An identifiable natural person is one who can be identified, directly or indirectly, in particular by reference to an identifier such as a name, an identification number, location data, an online identifier or to one or more factors specific to the physical, physiological, genetic, mental, economic, cultural or social identity of that natural person.

2) User

user means any identified or identifiable natural person whose personal data are processed by the developer.

3) Processing

Processing means any operation or set of operations which is performed upon personal data, whether or not by automatic means, such as collection, recording, organisation, filing, storage, adaptation or alteration, retrieval, consultation, use, disclosure by transmission, dissemination or otherwise making available, alignment or combination, restriction, erasure or destruction.

4) Restriction of processing

Restriction of processing is the marking of stored personal data with the aim of limiting its future processing.

5) Profiling

Profiling is any type of automated processing of personal data which consists of using such personal data to evaluate certain personal aspects relating to a natural person, in particular to analyse or predict aspects relating to that natural person's performance at work, economic situation, health, personal preferences, interests, reliability, behaviour, location or change of location.

6) Pseudonymisation

Pseudonymisation is the processing of personal data in such a way that the personal data can no longer be attributed to a specific user without the use of additional information, provided that such additional information is kept separately and is subject to technical and organisational measures to ensure that the personal data is not attributed to an identified or identifiable natural person.

7) developer or person responsible for processing

The developer or person responsible for processing is the natural or legal person, public authority, agency or other body which alone or jointly with others determines the purposes and means of the processing of personal data. Where the purposes and means of such processing are determined by Union or Member State law, the developer or the specific criteria for its designation may be provided for under Union or Member State law.

8) Processor

Processor means a natural or legal person, public authority, agency or other body which processes personal data on behalf of the developer.

9) Recipient

Recipient means a natural or legal person, public authority, agency or other body to whom personal data are disclosed, whether or not a third party. However, public authorities that may receive personal data in the context of a specific investigative task under Union or Member State law shall not be considered as recipients.

10) Third party

Third party means a natural or legal person, public authority, agency or other body other than the user, the developer, the processor and the persons authorised to process the personal data under the direct responsibility of the developer or the processor.

11) Consent

Consent means any freely given specific and informed indication of the user's wishes, in the form of a statement or other unambiguous affirmative act, by which the user signifies his or her agreement to the processing of personal data relating to him or her. 2.

2. name and address of the data developer

The developer within the meaning of the General Data Protection Regulation, other data protection laws applicable in the Member States of the European Union and other provisions of a data protection nature is:

Publisher: Jan Heuer

Address: Martin-Müller-Strasse 13
30900 Wedemark

Tel.: [+4932121087326](tel:+4932121087326)

E-Mail : mail @ sol X View .de

Kontakt: <https://www.solxview.de/kontakt>

Website: <https://www.solxview.de/datenschutz>

3. cookies

The internet pages of the App use cookies. Cookies are text files that are stored on a computer system via an internet browser.

Numerous Internet pages and servers use cookies. Many cookies contain a so-called cookie ID. A cookie ID is a unique identifier of the cookie. It consists of a string of characters by which Internet pages and servers can be assigned to the specific Internet browser in which the cookie was stored. This enables the visited Internet pages and servers to distinguish the individual browser of the user from other Internet browsers that contain other cookies. A specific internet browser can be recognised and identified via the unique cookie ID.

Through the use of cookies, the App Support Page can provide the users of this website with more user-friendly services that would not be possible without the cookie setting.

By means of a cookie, the information and offers on our website can be optimised for the benefit of the user. As already mentioned, cookies enable us to recognise the users of our website. The purpose of this recognition is to make it easier for users to use our website. For example, the user of a website that uses cookies does not have to re-enter his or her access data each time he or she visits the website, because this is done by the website and the cookie stored on the user's computer system. Another example is the cookie of a shopping basket in an online shop. The online shop remembers the items that a customer has placed in the virtual shopping basket via a cookie.

When calling up our website, the user is informed about the use of cookies for analysis purposes and his or her consent to the processing of personal data used in this context is obtained. In this context, a reference to this data protection declaration is also made.

The legal basis for the processing of personal data using technically necessary cookies is Art. 6 (1) lit. f DSGVO.

The user can prevent the setting of cookies by our website at any time by means of an appropriate setting of the Internet browser used and thus permanently object to the setting of cookies. Furthermore, cookies that have already been set can be deleted at any time via an internet browser or other software programmes. This is possible in all common internet browsers. If the user deactivates the setting of cookies in the Internet browser used, not all functions of our

website may be fully usable.

4. collection of general data and information

The website of the App collects a series of general data and information each time a user or automated system calls up the website. This general data and information is stored in the log files of the server. The following data may be collected: (1) the browser types and versions used, (2) the operating system used by the accessing system, (3) the website from which an accessing system accesses our website (so-called referrer), (4) the sub-websites which are accessed via an accessing system on our website, (5) the date and time of an access to the website, (6) an Internet protocol address (IP address), (7) the Internet service provider of the accessing system and (8) other similar data and information that serve to avert danger in the event of attacks on our information technology systems.

When using these general data and information, no conclusions can be drawn about the user. This information is rather required in order to (1) correctly deliver the contents of our website, (2) optimise the contents of our website as well as the advertising for the same, (3) ensure the permanent operability of our information technology systems and the technology of our website as well as (4) to provide law enforcement authorities with the information necessary for prosecution in the event of a cyber attack. Therefore, the data and information collected anonymously is, on the one hand, statistically and further evaluated with the aim of increasing the data protection and data security of our enterprise, and to ensure an optimal level of protection for the personal data we process. The anonymous data of the server log files are stored separately from any personal data provided by a user.

You can also visit this website without providing any personal information. However, in order to improve our online services, we store (without personal reference) your access data to this website. This access data includes, for example, the file you requested or the name of your Internet provider. By making the data anonymous, it is not possible to draw conclusions about your person. This does not apply to the IP addresses of the user or other data that allow the data to be assigned to a user. This data is not stored together with other personal data of the user.

5 SSL encryption

In order to protect the security of your data during transmission, we use state-of-the-art encryption procedures (e.g. SSL) via HTTPS.

6. contact option via the website

Based on statutory provisions, the support website of the App contains data that enable a quick electronic contact to our enterprise, as well as direct communication with us, which also includes a general address of the so-called electronic mail (e-mail address). If a user contacts the developer by e-mail or by means of a contact form, the personal data transmitted by the user will be stored automatically. Such personal data transmitted on a voluntary basis by a user to the

developer will be stored for the purposes of processing or contacting the user. No disclosure of such personal data to third parties will take place.

7. routine erasure and blocking of personal data

The developer shall process and store personal data of the user only for the period of time necessary to achieve the purpose of storage or where provided for by the European Directive and Regulation or other legislator in laws or regulations to which the developer is subject.

If the storage purpose ceases to apply or if a storage period prescribed by the European Directive and Regulation Maker or another competent legislator expires, the personal data will be routinely blocked or deleted in accordance with the statutory provisions.

8. rights of the user

1) Right to confirmation

Every user has the right granted by the European Directive and Regulation to obtain confirmation from the developer as to whether personal data concerning him or her are being processed. If a user wishes to exercise this right of confirmation, he or she may, at any time, contact any employee of the developer.

2) Right of access

Any person concerned by the processing of personal data has the right granted by the European Directive and Regulation to obtain at any time from the developer, free of charge, information about the personal data stored about him or her and a copy of that information. In addition, the European Directive and Regulation Body has granted the user access to the following information:

the purposes of the processing

the categories of personal data processed

the recipients or categories of recipients to whom the personal data have been or will be disclosed, in particular in the case of recipients in third countries or international organisations if possible, the planned duration for which the personal data will be stored or, if this is not possible, the criteria for determining this duration

the existence of the right to obtain the rectification or erasure of personal data concerning him or her, or the restriction of processing by the developer, or the right to object to such processing

the existence of a right of appeal to a supervisory authority

if the personal data are not collected from the user: Any available information on the origin of the data

the existence of automated decision-making, including profiling, pursuant to Article 22(1) and (4) of the GDPR and, at least in these cases, meaningful information about the logic involved and the scope and intended effects of such processing for the user.

Furthermore, the user shall have the right to obtain information as to whether personal data have been transferred to a third country or to an international organisation. If this is the case, the user

shall also have the right to obtain information on the appropriate safeguards in relation to the transfer. If a user wishes to exercise this right of access, he or she may contact an employee of the developer at any time.

3) Right of rectification

Any person affected by the processing of personal data has the right granted by the European Directive and Regulation to request the immediate rectification of any inaccurate personal data concerning him or her. Furthermore, the user has the right to request the completion of incomplete personal data, including by means of a supplementary declaration, taking into account the purposes of the processing. If a user wishes to exercise this right of rectification, he or she may, at any time, contact any employee of the developer.

4) Right to erasure (right to be forgotten)

Any person concerned by the processing of personal data has the right, granted by the European Directive and Regulation, to obtain from the developer the erasure without delay of personal data concerning him or her, where one of the following grounds applies and insofar as the processing is not necessary:

The personal data were collected or otherwise processed for such purposes for which they are no longer necessary.

The user revokes the consent on which the processing was based pursuant to Art. 6(1)(a) DS-GVO or Art. 9(2)(a) DS-GVO and there is no other legal basis for the processing.

The user objects to the processing pursuant to Article 21(1) DS-GVO and there are no overriding legitimate grounds for the processing, or the user objects to the processing pursuant to Article 21(2) DS-GVO.

The personal data have been processed unlawfully.

The erasure of the personal data is necessary for compliance with a legal obligation under Union or Member State law to which the developer is subject.

The personal data have been collected in relation to information society services offered pursuant to Article 8(1) DS-GVO.

If one of the aforementioned reasons applies, and a user wishes to arrange for the erasure of personal data stored by the Jan Heuer, he or she may, at any time, contact any employee of the developer. The employee of the Jan Heuer shall arrange for the deletion request to be complied with immediately. If the personal data has been made public by the Jan Heuer and our company is responsible for it pursuant to Art. 17 Para. 1 DS-GVO, Jan Heuer shall implement reasonable measures, including technical measures, to compensate other data developers for processing the personal data published, taking into account the available technology and the cost of implementation, in order to inform the user that he or she has requested from those other data developers to erase all links to or copies or replications of the personal data, unless the processing is necessary. The employee of the Jan Heuer will arrange the necessary in individual cases.

5) Right to restriction of processing

Any person concerned by the processing of personal data has the right, granted by the European

Directive and Regulation, to obtain from the developer the restriction of processing if one of the following conditions is met:

The accuracy of the personal data is contested by the user for a period enabling the developer to verify the accuracy of the personal data.

The processing is unlawful, the user objects to the erasure of the personal data and requests instead the restriction of the use of the personal data.

The developer no longer needs the personal data for the purposes of the processing, but the user needs it for the assertion, exercise or defence of legal claims.

The user has objected to the processing pursuant to Article 21(1) of the GDPR and it is not yet clear whether the legitimate grounds of the developer override those of the user.

If one of the aforementioned conditions is met, and a user wishes to request the restriction of personal data stored by the Jan Heuer, he or she may, at any time, contact any employee of the developer. The employee of the Jan Heuer will arrange the restriction of the processing.

6) Right to data portability

Any person concerned by the processing of personal data has the right, granted by the European Directive and Regulation, to obtain personal data concerning him or her, which have been provided by the user to a developer, in a structured, commonly used and machine-readable format. The user shall also have the right to transmit such data to another developer without hindrance from the developer to whom the personal data have been provided, provided that the processing is based on consent pursuant to Article 6(1)(a) of the GDPR or Article 9(2)(a) of the GDPR or on a contract pursuant to Article 6(1)(b) of the GDPR and the processing is carried out by automated means, unless the processing is necessary for the performance of a task carried out in the public interest or in the exercise of official authority vested in the developer.

Furthermore, when exercising the right to data portability pursuant to Article 20(1) of the GDPR, the user shall have the right to obtain the direct transfer of personal data from one developer to another developer where technically feasible and provided that this does not adversely affect the rights and freedoms of other persons. In order to assert the right to data portability, the user may at any time contact any employee of the Jan Heuer.

7) Right to object

Any user concerned by the processing of personal data has the right, granted by the European Directives and Regulations, to object at any time, on grounds relating to his or her particular situation, to processing of personal data concerning him or her which is carried out on the basis of Article 6(1)(e) or (f) of the DS-GVO. This also applies to profiling based on these provisions. The Jan Heuer shall no longer process the personal data in the event of the objection, unless we can demonstrate compelling legitimate grounds for the processing which override the interests, rights and freedoms of the user, or for the assertion, exercise or defence of legal claims. If the website operator processes personal data for direct marketing purposes, the user shall have the right to object at any time to processing of personal data processed for such marketing. This also applies to profiling insofar as it is related to such direct marketing. If the user objects to Jan Heuer

to the processing for direct marketing purposes, Jan Heuer will no longer process the personal data for these purposes. In addition, the user has the right, on grounds relating to his or her particular situation, to object to processing of personal data concerning him or her which is carried out by Jan Heuer for scientific or historical research purposes, or for statistical purposes pursuant to Article 89(1) of the Data Protection Regulation (DS-GVO), unless such processing is necessary for the performance of a task carried out for reasons of public interest. In order to exercise the right to object, the user may directly contact Jan Heuer or another employee. The user is also free to exercise his/her right to object by means of automated procedures using technical specifications in the context of the use of information society services, notwithstanding Directive 2002/58/EC.

8) Automated decisions in individual cases including profiling

Any person concerned by the processing of personal data shall have the right, granted by the European Directive and the Regulation, not to be subject to a decision based solely on automated processing, including profiling, which produces legal effects concerning him or her or similarly significantly affects him or her, provided that the decision (1) is not necessary for entering into, or the performance of, a contract between the user and the developer, or (2) is authorised by Union or Member State law to which the developer is subject and that such law lays down appropriate measures to safeguard the user's rights and freedoms and legitimate interests, or (3) is made with the user's explicit consent. If the decision (1) is necessary for entering into, or the performance of, a contract between the user and the data developer, or (2) it is made with the user's explicit consent, Jan Heuer shall implement suitable measures to safeguard the user's rights and freedoms and legitimate interests, which include at least the right to obtain the user's involvement on the part of the developer, to express his or her point of view and contest the decision. If the user wishes to exercise the rights concerning automated decisions, he or she may, at any time, contact any employee of the developer.

9) Right to withdraw consent under data protection law

Any person affected by the processing of personal data has the right granted by the European Directive and Regulation to withdraw consent to the processing of personal data at any time. If the user wishes to exercise the right to withdraw consent, he or she may, at any time, contact any employee of the developer.

9 Legal basis of the processing

Art. 6 I lit. a DS-GVO serves our company as the legal basis for processing operations in which we obtain consent for a specific processing purpose. If the processing of personal data is necessary for the performance of a contract to which the user is a party, as is the case, for example, with processing operations that are necessary for the delivery of goods or the provision of another service or consideration, the processing is based on Art. 6 I lit. b DS-GVO. The same applies to processing operations that are necessary for the implementation of pre-contractual measures, for example in the case of enquiries about our products or services. If our company is subject to a legal obligation by which the processing of personal data becomes necessary, such as for the fulfilment of tax obligations, the processing is based on Art. 6 I lit. c DS-GVO. In rare

cases, the processing of personal data might become necessary in order to protect the vital interests of the user or another natural person. This would be the case, for example, if a visitor were to be injured on our premises and as a result his or her name, age, health insurance details or other vital information had to be passed on to a doctor, hospital or other third party. Then the processing would be based on Art. 6 I lit. d DS-GVO. Finally, processing operations could be based on Art. 6 I lit. f DS-GVO. Processing operations which are not covered by any of the aforementioned legal bases are based on this legal basis if the processing is necessary to protect a legitimate interest of our company or a third party, provided that the interests, fundamental rights and freedoms of the user are not overridden. Such processing operations are permitted to us in particular because they were specifically mentioned by the European legislator. In this respect, it took the view that a legitimate interest could be assumed if the user is a customer of the developer (recital 47, sentence 2 of the GDPR).

(10) Legitimate interests in the processing pursued by the developer or a third party.

If the processing of personal data is based on Article 6 I lit. f DS-GVO, our legitimate interest is the conduct of our business for the benefit of the well-being of all our employees and our shareholders.

11 Duration for which the personal data is stored

The criterion for the duration of the storage of personal data is the respective statutory retention period. After expiry of the period, the corresponding data is routinely deleted, provided that it is no longer required for the fulfilment of the contract or the initiation of the contract.

(12) Legal or contractual provisions for the provision of personal data; necessity for the conclusion of the contract; obligation of the user to provide the personal data; possible consequences of non-provision

We inform you that the provision of personal data is sometimes required by law (e.g. tax regulations) or may also result from contractual regulations (e.g. information on the contractual partner). Sometimes, in order to conclude a contract, it may be necessary for a user to provide us with personal data that must subsequently be processed by us. For example, the user is obliged to provide us with personal data if our company concludes a contract with him or her. Failure to provide the personal data would mean that the contract with the user could not be concluded. Before providing personal data by the user, the user must contact one of our employees. Our employee will explain to the user on a case-by-case basis whether the provision of the personal data is required by law or by contract or is necessary for the conclusion of the contract, whether there is an obligation to provide the personal data and what the consequences would be of not providing the personal data.

13. modification of the data protection statement

We reserve the right to adapt this data protection statement so that it always complies with the current legal requirements or in order to implement changes to our services in the data protection statement, e.g. when introducing new services. The new data protection statement will then apply to your next visit.

14. existence of automated decision-making

We do not use automated decision-making or profiling.
